

Definition of the H5edit Command Language

1. Introduction

This section describes the command language (CL) of the *h5edit* tool. The description is in Backus-Naur Form.

2. Explanation of Symbols

This section contains a brief explanation of the symbols used in the CL.

<tname>	a token with the name tname
<a> 	one of <a> or
<a> _{opt}	zero or one occurrence of <a>
<a> _*	zero or more occurrence of <a>
<a> ₊	one or more occurrence of <a>
[0-9]	an element in the range between 0 and 9
