Release of the h4toh5 Conversion Library and Tools Version 2.2.3

Version 2.2.3 of the h4toh5 Conversion Library and Tools is now available from the HDF Downloads page:

<https://support.hdfgroup.org/downloads/index.html#h4h5>

It can be obtained directly from:

https://support.hdfgroup.org/products/hdf5_tools/h4toh5/download.html

This release was tested with HDF 4.2.13, HDF5-1.8.19, and HDF5-1.10.1, and contains many changes, including:

- Numerous improvements were made to the tools. For example:
 - h4toh5 now follows the HDF5 dimension scale specification to handle HDF4 SDS dimensions
 - "h4toh5 -eos" can now convert a 1D HDF-EOS2 swath to HDF5.
- Memory leaks in the library and tools were fixed.

Please see the Release Notes for complete details on what is new with this release:
